The Standard Barometer and Thermometer are read at 8 a.m., 10 a.m., 4 p.m. and 8 p.m. and the daily means are obtained by the application of hourly corrections, deduced from twenty years' observations. The station of the barometer is twenty-two feet above the level of the sea, and the position of the rain-gauge is two feet from the ground. The wind, rain and general weather registered are for the current and day—from midnight to midnight.

The total quantity of rain collected since 1st January is 10.75 inches, the average due for the same period being 12.00 inches.
